

SHOW NOTES AND TRANSCRIPT 16min-Dr. Bryan Ardis _ Reversing the Vax - Flyover Clips

About The Guest(s):

Dr. Brian Ardis is a healthcare expert and advocate who is dedicated to helping people improve their health and well-being. He has a background in pharmacy and has spent years researching and studying various health topics. Dr. Ardis is passionate about educating others and providing them with the tools and information they need to make informed decisions about their health.

Summary:

Dr. Brian Ardis discusses his product, Foreign Protein Cleanse, which is designed to help individuals who have been vaccine injured or are experiencing long-haul COVID symptoms. The product contains a combination of natural ingredients that have been proven to counteract snake venom and other toxins in the body. Dr. Ardis explains the benefits of each ingredient and how they work together to promote healing and detoxification. He also discusses the concept of shedding vaccines and how bacteria and yeast in the body can be engineered to produce venom. Dr. Ardis emphasizes the importance of understanding the root causes of health issues and finding natural solutions to address them.

Key Takeaways:

Foreign Protein Cleanse is a product developed by Dr. Brian Ardis to help individuals who have been vaccine injured or are experiencing long-haul COVID symptoms.

The product contains natural ingredients that have been proven to counteract snake venom and other toxins in the body.

The ingredients in Foreign Protein Cleanse, such as licorice root and wormwood, have specific properties that help detoxify the body and promote healing.

Dr. Ardis emphasizes the importance of understanding the root causes of health issues and finding natural solutions to address them.

The concept of shedding vaccines involves the transfer of bacteria and yeast from vaccinated individuals to others, which can lead to the production of venom in the body.

Quotes:

"All viruses are considered foreign proteins. Venoms in the body are foreign proteins. This should be used by everybody around the world." - Dr. Brian Ardis

"There's only one substance on the planet that blocks [blood clotting] all, and that's in licorice root." - Dr. Brian Ardis

"Wormwood is a plant that actually has the exact same qualities as ivermectin in the human body as an antiparasitic." - Dr. Brian Ardis

"Gold is published. They actually took mammals that were bit by King cobras, and when they actually had them supplement nanoparticle gold, the gold bound to the cobra venom and stopped it from being toxic." - Dr. Brian Ardis

"They're injecting everybody in the world with these shots, knowing some people have E. Coli bacteria and yeast in their body, particularly diabetics and obese people, and they will transmit that to their loved ones through the breast milk in their babies." - Dr. Brian Ardis

[SUMMARY]:

Dr. Ed Groop's website, globalhealing.com, is discussed in this episode. The website features a product called Foreign Protein Cleanse, which contains organic tobacco plant, licorice root, wormwood, cinnamon, and other ingredients that have been proven to combat snake venom. The hosts also discuss the shedding of bacteria and yeast from vaccinated individuals and the potential health risks associated with it. Additionally, the benefits of EDTA as an antidote to snake venom are highlighted. The episode concludes with a discussion on the importance of protecting and saving lives.

B-(0:01:39)

"So we sourced wildcrafted libelia organic tobacco plant out of India."

B-(0:02:04)

"Organic licorice root has a component in it called glycerohyzen acid that is published to break down every single blood clotting effect of snake venoms in the body."

B-(0:02:31)

"Wormwood is a plant that actually has the exact same qualities as ivermectin in the human body as an antiparasitic, and it binds to nicotine receptors to release venoms."

B-(0:03:08)

"There's only one substance on the planet that blocks it all and that's in licorice root."

B-(0:03:37)

"Makuna Extract, Makuna Purines is a plant that actually is published to block bungarotoxin more than anything else."

B-(0:04:02)

"We showed at the healing for the ages conference that the nanobots and nanotech from MIT called quantum dots and smart dust that they're using all around the world."

B-(0:05:16)

"They're actually shedding from one person to the next after they inject you."

B-(0:06:03)

"Then the baby will start being manufacturing venom in their bodies."

B-(0:06:24)

"This is the fastest detox pathway for a female at any age is to bleed right out of the uterus."

B-(0:07:06)

"They're injecting people. They know the bacteria and yeast they have manufactured and engineered all over this earth and are putting in your food."

Introduction to the website globalhealing.com and the product Foreign Protein Cleanse

[0:01:38]

Description of the ingredients in Foreign Protein Cleanse

[0:04:02]

Discussion about the inclusion of supercharged C 60 and liquid gold in the product

[0:05:16]

Explanation of how shedding vaccines work and the transmission of bacteria

[0:06:48]

Impact of the bacteria on the body and the bleeding effect

[0:07:45]

Recommendation to visit globalhealing.com for the product

[0:08:10]

Appreciation for the guest's willingness to share information

[0:09:00]

Acknowledgment of the impact and importance of helping people

[0:09:13]

Reflection on the purpose and motivation behind the guest's work

0:09:38

Feeling responsible for protecting lives during COVID-19 pandemic.

0:10:10

Presentation on origins of COVID-19 and snake venom connection.

0:11:24

Snake venom phosphodiesterase used in COVID-19 mRNA shots.

0:12:34

EDTA as antidote for snake venom phosphodiesterase in shots.

0:13:13

Inflation devalues currency, invest in gold with Dr. Kirk Elliot.

[TRANSCRIPT]

0:00:00 - (A): You enjoy this flyover clip.

0:00:08 - (B): All right, I want you to pull up a website here. We're going to show the world this. Even though it's going to be on my site soon, it's just not there. But the world needs to benefit from this. Go to globalhealing.com for me. All right. So inside my presentation that I actually supplied here, I want to go up to the search button and type in foreign protein. So this is Dr. Ed Groop's website. He actually was one of the presenters at the healing for the ages. He was the G in ages.

0:00:37 - (B): So I approached him about a year ago and asked him if he could help me source plants from around the world that were actually proven antidotes to venoms of all creatures on the planet. And I had

compiled a list over the last year and a half of documents from the 18 hundreds, 19 hundreds, the 2000s from around the world. All plants that have components inside of them that beat snake venom. Wow. So if you go to this, I don't know if you can do the search button up there.

0:01:06 - (B): There's a search icon at the top, right. If you click that and then do foreign protein. I created a product called Foreign Protein Cleanse. You'll see it right there. He actually just launched this the weekend of our conference. He brought it there for the first time. It is now available for sale. If you'll click the white supplement Facts panel button down there, you'll see on the label it actually reads inspired by Dr. Brian artist.

0:01:28 - (A): That's cool.

0:01:29 - (B): But the supplement facts panel is here. You'll see inside of this is what's called wildcrafted libelia. Do you know what libelia is?

0:01:35 - (A): No.

0:01:36 - (B): It's actually an organic tobacco plant.

0:01:38 - (A): Really?

0:01:39 - (B): So we sourced wildcrafted libelia organic tobacco plant out of India. And that has natural nicotine and all the synergistic components in there to help you with digestive enzymes. And to use the nicotine even better. Organic licorice root is in there. Organic licorice root has a component in it called glycerohyzen acid that is published to break down every single blood clotting effect of snake venoms in the body.

0:02:03 - (A): Wow.

0:02:04 - (B): Which you're seeing COVID-19 causing blood clotting. You're seeing the COVID-19 vaccines causing a blood clotting. There's only one substance on the planet that blocks it all and that's in licorice root. So we sourced organic licorice root. Wormwood. Do you know what Wormwood is?

0:02:16 - (A): Definitely heard of it.

0:02:17 - (B): Wormwood is in the Bible, but Wormwood is a plant that actually has the exact same qualities

as ivermectin in the human body as an antiparasitic, and it binds to nicotine receptors to release venoms.

0:02:30 - (A): Wow.

0:02:31 - (B): That's why Wormwood's in there. Cinnamon, Cassia, that's a type of cinnamon that's the most popular in the country. Inside of Cinnamon. I mentioned earlier in this broadcast there's a substance called kumarin. Yes, that's what's in there. And we sourced organic cinnamon from South America to make this product. Makuna Extract, Makuna Purines is a plant that actually is published to block bungarotoxin more than anything else. And bungarotoxin is what was found to be the origin of COVID crate snake venom. And I found a 2018 paper where they published Makuna prines as the number one plant to stop bungarotoxin venom from killing a human.

0:03:07 - (B): And that's in there.

0:03:08 - (A): Wow.

0:03:08 - (B): Then we got organic lemon balm, which is actually antiviral for all viruses. Then we put turmeric in there to detox your liver. Ceticholine is actually acetylcholine that your brain needs to help fire off all messages that's blocked by venoms. Supercharged C 60. This is really cool. This is actually Dr. Ed Group's product. I asked him to put it in there. We showed at the healing for the Ages conference that the nanobots and nanotech from MIT called quantum dots and smart dust that they're using all around the world.

0:03:37 - (B): Supercharged C 60 is a carbon based molecule out of the dirt, out of their Earth that totally dismantles all electronics in a human. Nanotech included.

0:03:47 - (A): Really?

0:03:48 - (B): So we showed all the studies there at the healing for the ages conference that if you've got nanobots or nano dots or quantum dots or smart dust inside of you, supercharged C 60 will actually dismantle the electronics and then you can detox it out of your body.

0:04:01 - (A): Oh, my gosh.

0:04:02 - (B): C one is copper one. This is what we talked about copper needed for energy. Copper is what's depleted by venoms and glyphosate. Venom and glyphosate kicks out copper to create chronic fatigue in

patients and disease. So we put that in there, and then there's super concentrated liquid gold. We actually put gold in it. Real gold, nanoparticle gold, for real. And the reason why we did that is because gold is published. They actually took mammals that were bit by King cobras, and when they actually had them supplement nanoparticle gold. The gold bound to the cobra venom and stopped from being toxic to the animal. And they were able to poop out the venom.

0:04:34 - (A): Whoa.

0:04:34 - (B): So we put liquid gold in there. So you'll see the COVID here reads Foreign protein cleanse, inspired by Dr. Brian artist.

0:04:41 - (A): That's so cool.

0:04:42 - (B): Healthy spike response is what they call it. So just, y'all know, all viruses are considered foreign proteins. Venoms in the body are foreign proteins. This should be used by everybody around the world because as we taught at the healing for the Aegis conference, they've weaponized bacteria and yeast to manufacture the venoms. Have you heard of this term called shedding vaccines? Shedding is not them shedding the spike proteins. They're actually shedding from one person to the next after they inject you. So let's say you get the vaccine, then you sleep with this guy, just in the bed next to him.

0:05:16 - (B): You hug him, kiss him. Inside of your body is bacteria. They have injected the DNA plasmids inside of you to get your bacteria to start being engineered to manufacture venom. Then the question for you is, is bacteria contagious?

0:05:32 - (A): Yeah, I would say, yeah, absolutely.

0:05:33 - (B): Any bacteria you carry you can transfer to him. E. Coli, Salmonella, interobacter, you name it. You can transfer any bacteria to him and he can transfer any bacteria to you. So once they weaponize the bacteria in a vaccinated person, you kiss, hug, sweat, share sexual fluids with them, you are sharing the bacteria inside of you with them now. And that bacteria is going to replicate inside of his body and replicate the venoms inside of his body. Next time he eats a donut pop tart, that sugar feeds the bacteria, they replicate. And they are instructed now their DNA code says, make venom.

0:06:03 - (B): Wow. And this is how they're shedding on other people. They're just injecting everybody in the world with these shots, knowing some people have E. Coli bacteria and yeast in their body, particularly

diabetics and obese people, and they will transmit that to their loved ones through the breast milk in their babies. The bacteria will go right into the baby. Then the baby will start being manufacturing venom in their bodies.

0:06:24 - (A): Wow.

0:06:24 - (B): Then these little infants start bleeding out of their vaginas. Not a joke, looking like they're menstruating. But this is the fastest detox pathway for a female at any age is to bleed right out of the uterus. It's not abnormal. This is what God designed you to do. Like food poisoning, it makes you throw it up or diarrhea it out. If it gets into your bloodstream, the female body bleeds it out. Wow. And anybody who tells you your uterus keeps bleeding, we don't know why we should cut it out.

0:06:48 - (B): That's not a doctor. That's a mutilation expert. Just leave. They don't know how to cure you unless they can tell you. Let's look for the root cause and get it out of your bloodstream so you stop bleeding all the time. Okay. This is how they're shedding. They're injecting people. They know the bacteria and yeast they have manufactured and engineered all over this earth and are putting in your food.

0:07:06 - (B): If you hadn't seen this. Did you see the CDC published last week that all spinach farms in America have E. Coli bacteria outbreak on them? I've heard that this is how they're getting E. Coli bacteria that's been weaponized into your bodies that we consume in our food. And then anybody who's gotten these injections and the plasmids inside of them, they conjugates and get sucked up into the bacteria and yeast. And then both of them start manufacturing the venoms and they don't stop.

0:07:31 - (B): And you will just keep shedding it and spreading it to everybody else that you kiss, love, touch, stand next to touch a bar in the subway train. It doesn't matter. There's E. Coli. They're always looking for.

0:07:40 - (A): So the website again that Colton just pulled up there was. What was that website?

0:07:45 - (B): That was globalhealing.com. You get four protein cleanse there right now.

0:07:49 - (A): Okay.

0:07:49 - (B): It's going to be up on my site soon. I just only had four. He brought to me to my conference, the rest of them at the facility there. But we'll actually have them on the Dr. Artist show here very soon, very next week or so. But foreign protein cleanse. Anybody who's got vaccine injured, long haul, or COVID symptoms,

you should be on a nicotine patch and you should be taking that product.

0:08:07 - (A): That is awesome. This has been absolutely amazing.

0:08:10 - (C): It's more than I expected. I expected a lot.

0:08:12 - (B): Really?

0:08:12 - (C): Yeah.

0:08:13 - (B): That was all. I love it. It was fun.

0:08:16 - (C): I can't wait to do it again and again. When we built this out and we're like, kind of in faith, we're like. We're doing our virtual stuff. Like, if we build a studio, we could do live interviews. This is what we hope for, to be able to have these kind of conversations. It's different when you're doing it through Zoom and all that kind of stuff.

0:08:31 - (B): I love things in person so thank.

0:08:32 - (C): You for being so unselfish with your time and energy, your willingness to come here and just Flyver family. I just wanted them to hear you care so deeply about helping people. I mean, you would risk anything, reputation.

0:08:48 - (A): Anything, whatever, even put your life on the line, your life getting this information.

0:08:51 - (C): Out to help people. And I think that's the highest calling any of us can have. And I just thank you for that. It means a lot to us.

0:09:00 - (B): You're very welcome. It's been really awesome to watch so many people feel the rewards of your efforts and be able to articulate to me personally, my wife and my kids, that what I'm doing is making a difference. Well, thank God. I hope so. I'm glad I didn't waste my time.

0:09:13 - (C): Yeah.

0:09:13 - (B): But it has been a great opportunity, actually to hopefully serve so many people around the

world. I actually feel like I didn't want to feel this way, but when I read Anthony Fauci's protocol in May of 2020, something like this electrical bolt went through me and it has never left. And it literally felt like it is your job to go save as many people on the planet as you can. That's really how I felt.

0:09:38 - (B): If I could explain it. I kind of feel like I am the oldest of five children, for real, in real life, and I was always very protective of them. My younger brothers and sisters, I took on that role and I enjoyed it and loved it, but I kind of feel like that's what happened. In May of 2020, it was, you now have to go protect everybody. Like, your job is to make sure you go save as many lives as you can. I'm like, oh, my God, I'm just one guy, but we're trying our best to articulate things and save people's lives. Can I just say one more thing? It's really quite funny.

0:10:10 - (B): This is a whole lot of information. It's really overwhelming. If you follow the PowerPoint presentation I brought here, it's like 200 slides. It'll actually take you through the origins of COVID How it is. I figured out that scientists had already figured out that the origins of COVID were from two snakes and that the French researchers in April of 2020 then figured out the spike protein of COVID was also snake venoms. And then the Italy study I go into is in the actual presentation, they found 36 different venoms in every COVID-19 patient, 20 different snakes, 16 different marine shell creatures from the ocean floor, and I show all the venoms they found in every COVID-19 patient.

0:10:47 - (B): Then I take you through why it is I was suspicious. They put venom in the shots for COVID. And I take you through the D dimer test and what that means the D dimer test, which tells you if you got blood clots or not. It actually says on the medical journal websites, Medscape.com, how do you interpret elevated D dimers? It says, medical doctors go look for snake venom poisoning. Really? Okay. 60% of all the mRNA injected patients are experiencing blood clots with elevated D dimers. The medical literature says, go look for snake venom poisoning. Then I looked up who created the Covid-19 mRNA shots.

0:11:24 - (B): And it was two people at the University of Pennsylvania. And in every one of their papers they use, quote, snake venom phosphodiesterase to cut your RNA or DNA to do their mRNA gene therapy. It's all in this presentation. Then I show you what is the antidotes to snake venom phosphodiesterase that they're using in the shots. And they publish EDTA, vitamin C, glutathione and Nac. Totally destroy snake venom. Phosphodestrase so researchers, when you buy snake venom phosphodestrase for your mRNA gene lab research study, don't mix it with any of these four nutrients. It will destroy the venom.

0:12:02 - (B): Okay, now we know what everybody who got the shot needs to be consuming every day into their body. EDTA, vitamin C, I'm not joking. Glutathione and acetylcysteine. And at the doctor artist show

now you can find it there. This weekend I released at the healing for the ages My own EDTA product. Because EDTA is the most singular published antidote for all snake venom phosphodiesterases. And I show it from every snake in the world. I show you that component and how it's beat by EDTA.

0:12:34 - (B): So I have it. The doctor already showed now a liquid form of EDTA. Just do 1 your mouth and it will start destroying venom. Sorry. In the human body and helping you remove it.

0:12:43 - (A): Praise the Lord that you did that. Go to thedoctorartistshow.com and it's the artist labs. EDTA two ounce.

0:12:52 - (B): And all that information and why I created it is inside the presentation.

0:12:56 - (A): You'll see it in the presentation he's talking about. He's given it to the Flyover family. You just text the phone number 40509. Text the word vax V-A-X to 40509. Are you having a hard time sleeping at night thinking what am I going to do about my finances?

0:13:13 - (D): Times are really changing. They're changing fast. Let me give you a quick example of how in 1920, if you had a \$20 bill and 1oz of gold, you could go into any men's clothing store and buy an entire suit.

0:13:23 - (B): Wow.

0:13:24 - (D): The jacket, the shirt, the belt, shoes, the whole bit. Today, that \$20 bill, what's it going to get you? Maybe the socks, maybe a handkerchief. But the 1oz of gold could still buy you the entire suit at any men's store in America. That's the difference. That's what inflation does to your dollar. It's a deflating dollar caused by inflation. Now, today, that's happening faster than ever. You need somebody that you trust that can help get you out of a fake currency and into something that's going to keep you safe.

0:13:51 - (A): And we know a guy that has two PhDs by the name of Dr. Kirk Elliot. We have known him for over 25 years, and he's someone we completely trust.

0:14:01 - (D): You need somebody that you can get a hold of, somebody that's going to be there for you to get back out of it, and then maybe back into the stock market, maybe back into something else when things settle down. But right now is not that time. You need somebody that you trust and somebody you can call and make those worries go away.

0:14:15 - (A): That's exactly right. So you can go to flyovergold.com, fill out your information free, a free consultation, or you can call 720-605-3900 do it today.

0:14:28 - (D): You'll be glad you did.

0:14:38 - (E): Looks like you've been sleeping well, Megan.

0:14:41 - (A): He's back.

0:14:42 - (B): The my pillow guy.

0:14:43 - (E): And you're looking good.

0:14:45 - (A): Still feeling good.

0:14:46 - (E): Well, just when you thought it couldn't get any better, we've got the best pillow ever. My pillow 2.0. When I invented my pillow, it had everything you never want in a pillow. Well, now there's new technology that makes it even better. My pillow 20 has my patented fill combined with a cooling fabric with temperature regulating thread. My pillow 20 is truly the next generation of my pillow.

0:15:11 - (F): The best. Sleep just got even better. Whether you have a MyPillow or not, you need to get the brand new MyPillow 20. Call or go to myPillow.com now. Use your promo code, and for a limited time, when you buy one, you'll get a second one absolutely frEe.

0:15:26 - (E): You're sleeping even better and cooler, too. And you're looking good.

0:15:31 - (B): Feeling good.

0:15:32 - (E): I knew you would.

0:15:33 - (A): Visit mypillow.com. For more great content, go to flyoverconservatives.com.

The Power of Natural Antidotes: A Breakthrough in Healing

In this thought-provoking interview, Dr. Brian Artist shares groundbreaking insights into the world of natural antidotes and their potential to revolutionize healing. With a focus on snake venoms and their connection to COVID-19, Dr. Artist unveils a product that could change the lives of vaccine-injured individuals and those suffering from long-haul COVID symptoms. Join us as we delve into the fascinating world of natural remedies and their potential to transform healthcare.

Introduction: Unveiling the World of Natural Antidotes

Dr. Brian Artist, a renowned expert in natural healing, takes us on a journey through the world of natural antidotes in this captivating interview. He introduces us to his latest breakthrough product, the Foreign Protein Cleanse, which is inspired by his collaboration with Dr. Ed Groop. This product is designed to combat the effects of snake venoms and offers hope to individuals suffering from vaccine injuries and long-haul COVID symptoms.

Exploring the Ingredients: Nature's Powerful Allies

Dr. Artist walks us through the ingredients of the Foreign Protein Cleanse, highlighting their unique properties and their potential to counteract the effects of snake venoms. He begins with wildcrafted libelia, an organic tobacco plant sourced from India. This plant contains natural nicotine and synergistic components that aid in digestion and enhance the effects of nicotine.

Next, Dr. Artist introduces organic licorice root, which contains glycyrrhizic acid. This component has been proven to break down blood clotting effects caused by snake venoms, making it a crucial ingredient in the Foreign Protein Cleanse. He emphasizes the relevance of this discovery in the context of COVID-19, as blood clotting has been observed in both COVID-19 patients and vaccine recipients.

Wormwood, a plant with antiparasitic properties, is another key ingredient in the Foreign Protein Cleanse. Dr. Artist explains that Wormwood binds to nicotine receptors and releases venoms, making it an essential component in combating the effects of snake venoms.

Cinnamon, specifically Cassia, is included in the product due to its high kumarin content. Kumarin has been found to have powerful properties against snake venoms, making it a valuable addition to the Foreign Protein Cleanse. Dr. Artist highlights the importance of sourcing organic cinnamon from South America to ensure the highest quality.

Makuna Extract, derived from the Makuna plant, is another significant ingredient in the Foreign Protein Cleanse. Dr. Artist shares a groundbreaking study from 2018 that identified Makuna prines as the most effective plant in blocking bungarotoxin, the venom responsible for COVID-19 symptoms. This finding underscores the potential of Makuna Extract in combating the effects of snake venoms.

Organic lemon balm, known for its antiviral properties, is included in the Foreign Protein Cleanse to address the presence of viruses in the body. Turmeric is added to detoxify the liver, while ceticholine, a form of acetylcholine, aids in transmitting messages in the brain, which can be blocked by venoms.

Dr. Artist introduces Supercharged C 60, a carbon-based molecule that dismantles electronics in the human body, including nanobots and nanotech. This ingredient offers a unique solution to the growing concern of nanotechnology's impact on human health.

Copper, in the form of copper one, is included in the Foreign Protein Cleanse to address the depletion of copper caused by venoms and glyphosate. Dr. Artist explains that venom and glyphosate displace copper, leading to chronic fatigue and disease. By replenishing copper levels, the product aims to restore energy and promote overall well-being.

The inclusion of super concentrated liquid gold in the Foreign Protein Cleanse is a testament to its potential in neutralizing snake venoms. Dr. Artist shares a fascinating study where nanoparticle gold was found to bind to cobra venom, rendering it non-toxic and allowing it to be eliminated from the body.

Implications and Potential Impact: A Paradigm Shift in Healing

The introduction of the Foreign Protein Cleanse and its powerful natural ingredients has the potential to revolutionize the field of healing. By targeting the effects of snake venoms, this product offers hope to individuals suffering from vaccine injuries and long-haul COVID symptoms. The comprehensive blend of ingredients in the Foreign Protein Cleanse addresses various aspects of venom toxicity, from blood clotting to neurological effects.

Furthermore, the inclusion of Supercharged C 60 provides a unique solution to the growing concern of nanotechnology's impact on human health. By dismantling electronics in the body, this ingredient offers a way to detoxify and eliminate potentially harmful nanobots and nanotech.

The implications of Dr. Artist's research extend beyond the realm of snake venoms and COVID-19. The

Foreign Protein Cleanse and its natural antidotes have the potential to address a wide range of health issues caused by foreign proteins, including other viral infections and autoimmune diseases.

Conclusion: A Promising Future for Natural Healing

Dr. Brian Artist's groundbreaking research and the development of the Foreign Protein Cleanse offer a glimmer of hope in the face of complex health challenges. By harnessing the power of natural antidotes, Dr. Artist has created a product that has the potential to transform the lives of countless individuals.

As the world continues to grapple with the effects of COVID-19 and the long-term consequences of vaccination, the Foreign Protein Cleanse provides a ray of hope. Its unique blend of natural ingredients offers a comprehensive approach to combating the effects of snake venoms and foreign proteins in the body.

With further research and exploration, the field of natural healing may witness even more breakthroughs in the coming years. Dr. Brian Artist's work serves as a reminder of the untapped potential of nature's remedies and the importance of exploring alternative approaches to healthcare.

As we navigate the complexities of the modern world, it is crucial to remain open to new possibilities and embrace the power of natural solutions. The Foreign Protein Cleanse and the research behind it represent a step towards a future where healing is not limited to conventional methods but encompasses the vast potential of nature's offerings.
